

## Sustainability fee on your stay with us

Effective from 1 March 2020, Hotel Skt. Petri will be charging a sustainability fee.

The fee, which amounts to DKK15 fee per person per stay, is intended to help make our guests aware of their contribution to the financing of the extraordinary sustainability efforts and initiatives planned for Hotel Skt. Petri in future.

As a hotel we are co-responsible for ensuring that the environmental footprint of our activities is reduced to a minimum. By charging a specific sustainability fee we make our green efforts more visible to our guests and help them discover all the things we do at Skt. Petri to achieve a green transition.

The proceeds of the fee will be used primarily for investments in new sustainability initiatives in supplement of the green efforts financed by our daily operations. Among the new initiatives planned for 2020 and 2021 are the testing and development of a new plant that in the long term will reduce our Co2 footprint and make us almost self-sufficient in electricity from a local, sustainable source.

Hotel Skt. Petri publishes an annual report with a detailed account of its sustainability efforts and achievements. This enables all our guests to follow the way in which the sustainability fee paid by them contributes to a green transition at our hotel.

The report on our progress and achievements is prepared by an independent third party. The first report will appear in 2021 and will be available on our website at: <https://www.sktpetri.com/sustainability/>. Our website also has more information about all the other activities contained in WE CARE - the overall programme for all sustainability efforts undertaken by Hotel Skt. Petri.

We at Skt. Petri are proud that, together with our guests, we contribute to the green transition and development.
